ABOUT US

We offer outdoor space solutions that can be used all year, regardless of the seasons.

Thus, everyone can access open areas no matter the season and can spend a good time in functional and comfortable spaces prepared specially for the user.

We put all our energy, intellectual capital, international network, and professional teams to use in designing and producing new generation movable building systems such as bioclimatic pergolas, movable pergolas, awnings, and glass systems. Pergotech products are exported all over the world.

We support the main product groups with a range of different products and accessories such as glass doors, alternative vertical systems, lighting options and heaters.

Our secret has been listening to our customers, identifying the needs correctly, focusing on the requests with our expertise and capabilities of our team for the last 46 years. To offer the best by combining our customers' feedback and our skills...

A brand of Altun Tente Sanayi ve Limited Şirketi, which is the expert of the industry.

EXPLORING OPEN SPACES SINCE 1978...

Since
1978

VISION

We want to create sustainable and comfortable spaces and touch people's lives to make it easier for them across the world.

We want to help our customers to enjoy the beauty of exciting spaces with outdoor solutions and sun protection products to ensure that they benefit from dwelling and commercial spaces to the maximum extent and enjoy the moment. We continue to develop and produce with this passion.

MISSION

We like to produce various solutions, both innovative and safe outdoor solutions, and most importantly, spaces that are made specific for the customers' needs in line with their demands.

We combine design with technology.

We build projects with our belief in people, ethical values and the value of solution partnership.

Pergotech brand is a growing network with those who believe in us and our professional staff...

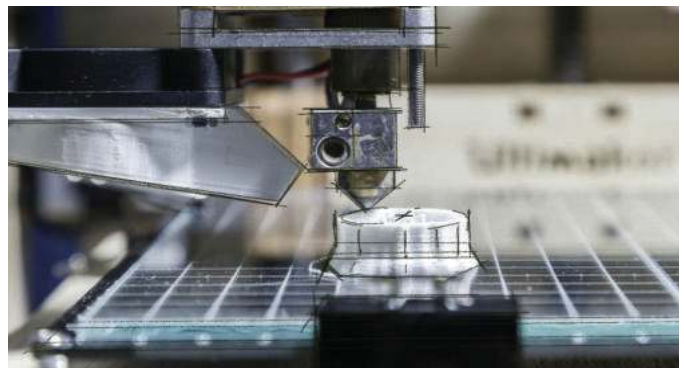

ETHICS

Loyalty, reliability, confidentiality, and fairness are essential for Pergotech. Ethics sets the company's values, rules, commitments, and ethical obligations, and the outline of corporate activities.

DEVELOPMENT

Continuous development is an exciting journey for Pergotech. We constantly redefine and develop ideas, methods, products, and services. The continuous search for redefinition and development in the constant flux of change is a driving force for us. Our goal is to develop continuously in every field.

EXPLORING OPEN

CUSTOMER-PROJECT ORIENTATION

We conduct the project and design processes of our products with the needs of our customers in mind and create new spaces that would make their lives more comfortable. We show special care to our customers in all phases of the project and afterward. We reach out to our customers quickly with our regional dealers, representatives, and teams in after-sales services and offer fast solutions. Accessibility is of great importance in our corporate culture.

PARTNERS

Our solution partners and dealers are the keys to a better business. The basis of our understanding in our relationship with dealers and suppliers is mutual understanding and shared core values. Our relationship is based on transparency and a determination to be the best version of ourselves.

SUSTAINABILITY

Pergotech products allow more and effective use of natural energy resources and consume less energy. Our products are sustainable and environmentally friendly.

SPACES SINCE 1978...

WHY CHOOSE PERGOTECH?

WHY PERGOTECH?

FUNCTIONALITY

Pergotech products consist of new generation moveable architectural systems. The common feature of user oriented products is that they are shaped according to functional and individual needs. It makes outdoor spaces habitable irrespective of seasons by obtaining maximum efficiency out of the spaces. It dilates the spaces. It offers the luxury of using open spaces with aesthetics and interior comfort throughout the year.

SUSTAINABILITY

With the materials and production methods which is used, pergotech systems increase the lifetime of the products. It lessens energy consumption with environmentally friendly components and provides savings. It creates a microclimate by enabling the use of natural energy. It lessens the energy consumption of Air conditioning and lighting.

PROJECT ORIENTED

With its project-oriented approach, pergotech offers solutions by knowing the fact that each project has different dynamics than others and by evaluating the specific conditions of each project. With its boutique production approach, it can go beyond standard solutions.

INTELLECTUAL CAPITAL

Pergotech – Bynter International has been operating in the field of moveable architectural solutions for 46 years. It has gained experience by taking part in the project designing, production and implementation of numerous projects in many parts of the world. Pergotech offers solutions by using its intellectual capital and high level of gained knowledge.

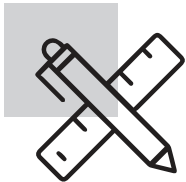

ACCESSIBILITY

Although pergotech's products are used for years without any problems with their long service life, there are dealer systems in many parts of the world. Pergotech gets back to its customers within 24 hours by its experienced staff in matters like technical support during the sales and project planning and after the sales. Being accesible in organizational culture and principles carries great importance.

OUR SERVICES

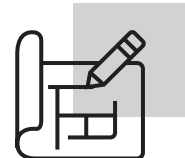

DESIGN

We adopt a careful approach in the design phase to realize the best project for you. We combine all the details together with our suggestions and your requests to ensure unique and good results.

PROJECT

Your project is delivered by our professional team with the most accurate offer and a 2D version of the project. A 3D version of the project and the static analysis report are also delivered according to demands and risks.

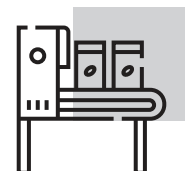

MANUFACTURING

All systems are manufactured in our factory. We have been carrying out the entire production in our own facility for the last 46 years. Orders are made ready for delivery after a quality check.

SHIPPING AND ASSEMBLY

As Pergotech, we provide direct assembly services in regions where we do not have a dealer. We also direct you to our dealers and follow up to ensure that you have no problem in contact and service depending on your region.

PERGOLA

PERGOTECH outdoor pergolas are next-generation and qualified systems designed with inspiration from the oldest sun protection structures of Southern Europe and the world. These are auto-controlled pergolas that are directly integrated into a building, wall, or fixed to the floor. They may be put into use a garden, pool or seaside, summer terrace, restaurant, leisure, hotels, in short, numerous places where people live and rest. The retractable pergolas are built as an integral part of the building and their slope may differ according to the weather conditions of the country and region and the position of the horizon, but there is always a certain slope.

Systems are made of powder - coated aluminum and are strong and durable. Blackout technology along with the special integrated and horizontal PVC fabric aluminum profiles provides increased strength and allows the system to move on the rail, and also provides a mechanism that acts as a lightning system. All pergola systems of Pergotech can be customized for application in areas of different sizes, and single-module and multi-module solutions are available with project - specific supporting products and endless color alternatives.

GENERAL FEATURES

Protection

PERGOTECH systems are designed for all weather conditions and each product has its own protection feature.

Materiel

PERGOTECH systems are of aluminum structure and use full inox screws and fittings. The used blackout fabric is flameproof and easy to clean.

CERTIFICATES

Certified Design

CE Certificate

All our products are CE certified and are produced in line with European standards.

Global Brand

Pergotech is a global trademark registered with EUIPO and protected in more than 40 countries in Europe and across the world.

Quality Certificate

Pergotech has a quality certificate and guarantees offering world class products.

ADVANTAGES

Guarantee

Motors are guaranteed for 5 years and control systems for 3 years in products with a Somfy motor starting from the date of production.

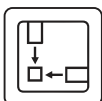

Waterproofness

Pergotech systems are designed with a waterproofness feature and provide excellent waterproofness in all four seasons.

Final Details

Pergotech products do not have any visible screws on their surface.

Quick Assembly

We have been working on this issue for many years to offer a quick assembly. Pergotech products are products that can be assembled anywhere in the world. The products can be assembled quickly with a series of simple operations with the parts pre-assembled in the Pergotech factory and the documents specifying all the assembly details.

Quick Connect

The motor and connection systems are assembled very quickly just as the whole system. The gear system mechanism can be made ready to use in just minutes.

Motorized Automatic System

Pergotech systems can be controlled in seconds thanks to the motorized mechanisms. You can open and close, control the lights and a range of products with those mechanisms.
